

IN THE SPECIFICATION

Please delete all previous continuation data from page 1 of the specification, lines 5-7, including any previous amendments thereto and substitute the following:

--This application is a continuation of Ser. No. 08/769,092, filed December 18, 1996, now U.S. Patent 5,751,806, which is a division of Ser. No. 08/181,394, filed January 12, 1994, now U.S. Patent 5,590,195, which in turn is a continuation-in-part application of Ser. No. 08/031,763, filed March 15, 1993, now U.S. Patent 5,406,626.--

IN THE CLAIMS

Please amend Claim 1 as follows:

1. (Amended) A receiver adapted to receive data contained in a transmitted broadcast signal comprising:
 - a tuner for [extracting data from] receiving a broadcast signal;
 - a memory coupled to the tuner for storing [the extracted] data in the received broadcast signal [as] in a database;
 - a user interface for providing a set of menus describing the database, and for accepting selections from the set of menus;
 - a controller coupled to the memory and the user interface [database] for selecting data from the database in response to the accepted selections and providing the selected data in a digital form; and
 - a speech producing sub-system coupled to the controller and the memory for converting the selected data from digital form to an analog signal [representing an original audio signal].
